Order Online | Immediate Overnight Delivery

Magellan is our HHS/OHRP, BBRB and ISBER compliant Biorepository where R&D Scientists can select and purchase the research samples they need to validate the clinical and analytical performance of next-generation IVD tests, companion diagnostics, instruments systems and molecular detection technologies.

Find Your Clinical Research Samples in these Product categories:

- » Infectious Disease » Cancer » Chemistry and Immunology » Microbiology » Human Biofluids
- » Validation Panels » Cardiac Disease » OBGYN | Fertility » Whole Blood, Serum & Plasma » DNA | RNA
- » Flu | Respiratory Viruses » By Cohort | Pathology » Therapeutic | Drugs of Abuse » Microbiology

Applications:

- » Clinical Research Samples obtained from Magellan can be used in FDA 510K and PMA registration studies (501K or PMA) and related Bioanalytical method validation studies.
- » Develop companion diagnostics for Patients based on their genetic characteristics and likelihood of a positive response to new drug treatments.
- » The development of screening tests for novel biomarkers associated with specific subtypes of disease.
- » Validate drug targets and disease mechanisms in vitro.

Samples obtained from HIPPA Compliant, CAP and CLIA Certified Clinical Laboratories
